ANNUAL HEALTH SCREENS

CONSENT FORM

As part of your pet's annual vaccination program, we will give your pet a thorough physical exam. This procedure allows us to determine the overall physical health of your pet. It allows us to examine your pet for problems, which may be considered breed specific. This simply means that certain dogs and cats are pre-disposed to certain health problems. For example, if you own a cocker spaniel, you have no doubt at some time dealt with an ear problem.

Our physical examination will help alert you to potential problems, which may occur. The physical exam, however, does not allow us to determine the general health of the internal organs. We need to be sure the liver, kidneys, etc. are functioning properly as well. Only a blood screen will do that. This short procedure will detect any liver and kidney problems, as well as check for anemia, diabetes, and infection. We recommend this screening for all pets two (2) years of age and older. It can be done using the same blood which has been pulled for your pet's annual occult heartworm test. As in all health evaluations, early detection is the key as it allows for more and better treatment options. The cost for this procedure is \$ _____ and is highly recommended.

_____ Yes, Complete the recommended procedure at this time.

_____ No, I wish to decline this health Screen procedure at this time.
